

Biotech Dental, guarantee of quality

With **more than 2 million implants sold around the world**, we offer global solutions to dental surgeons so that patients can benefit from the best treatments.

«Made in France» in our own factories

All of our implants are manufactured in our production unit located in Scionzier in the Vallée de l'Arve - Biotech Dental Manufacturing. Our factory has perpetuated its knowledge for 120 years and our implants are produced with the rigour and precision inherited from our watchmaking traditions.

R&D is our priority

Every year, Biotech Dental allocates more than 12% of its turnover to research and development in order to design and offer products at the forefront of innovation.

Over 30 years of experience supporting practitioners and their patients

With more than 30 years of experience in the designing and manufacturing of dental implants, Biotech Dental is committed to offer even more innovative and scientifically proven products. Today, we are a valued partner for dental practitioners.

Worldwide presence

Biotech Dental supports dentists and their patients in more than 80 countries around the world.

The **Biotech Dental** group, founded in 1987, is a key player in the health sector and is positioned among the leaders on the market for implantology, prosthesis, orthodontics by aligners and highly technological dental equipment.

The only dental manufacturer to benefit from the Origine France Garantie certification, the French Tech and French Fab labels. The Group, is proud to embody the « **100% Made in France*** » medical know-how.

DENTAL IMPLANTS

MADE IN FRANCE*

What is an implant?

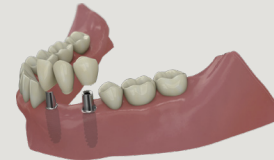

The dental implant is an artificial root onto which a crown, a bridge or a full prosthesis (fixed or detachable), is fixed to replace the missing tooth.

In which cases should implants be considered?

> To replace **a missing tooth**

> To replace **several teeth**

> To replace **all the teeth**

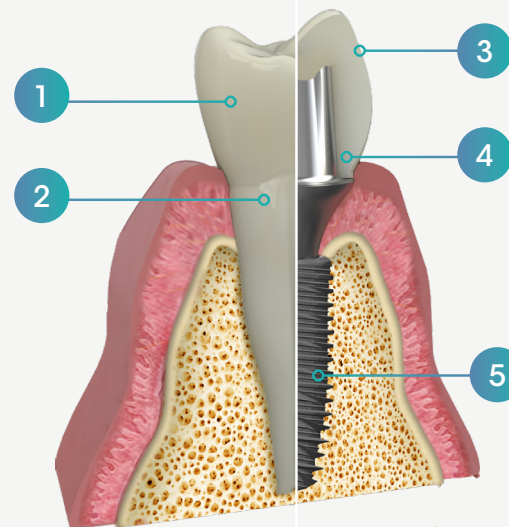

Cement-retained or trans-screwed bridge on implants

Removable prosthesis stabilized with implants

For a better understanding:

- 1 Natural tooth
- 2 Natural root
- 3 Crown on implant
- 4 Prosthetic abutment: titanium unit which is screwed onto the implant and on which the crown will be fixed.
- 5 Dental implant (artificial root) from a titanium biocompatible material
